

## KJR Associates Inc

Founded in 2004, KJR Associates Inc is a Manufacturers' Representative Company whose Clients' provide the Inspection, Repair, Replacement, Manufacture and Installation of Construction, Industrial and Power Generation equipment.

Kevin J. Rutkiewicz, President of KJR Associates Inc, started his career in the Power Generation Industry in 1988 working for Allis-Chalmers, AC Equipment Services, Siemens Power Corporation, Siemens Westinghouse, ReGENco and Wood Group. Kevin represents manufacturers of products and services that he firmly believes in and is selective in the companies that he chooses. These companies complement each other in the Construction, Industrial and Energy Industries. Because of his long standing relationships developed over the years with numerous customers and contacts they help to deliver KJR Associates' goal of customer satisfaction.

KJR Associates Inc Customers include but not limited to: Alliant Energy, Ameren, Archer Daniels Midland (ADM), Arkansas Electric Cooperative, Blue Island Phenol, Calpine, City of Dover, CMS Energy, Colorado Springs Utilities, Consumers Energy, Detroit Renewable Power, Dynegy, Entergy, ExxonMobil, Georgia Institute of Technology, Great River Energy, Lansing Board of Water & Light, Madison Gas & Electric, Metropolitan Water Reclamation of Greater Chicago, Michigan State Central Power, Michigan State University, Minnkota Power Cooperative, Morris Cogeneration, New Page Corp., NRG Energy, Otter Tail Power, Tri-State G&T, University of Illinois, University of Wisconsin, We Energies, Westar Energy, Wisconsin Public Service and Xcel Energy.

Ethanol Plant Customers: Adkins Energy, Andersons Ethanol, Aventine Renewable Energy, Badger State Ethanol, Carbon Green Bio Energy, Didion Ethanol, Illinois River Energy, Marquis Energy, Marysville Ethanol, Patriot Renewable Fuels, United Ethanol, United Wisconsin Grain, Western Wisconsin Energy.

Motor, Turbine & Generator Repair Company Customers: Action Turbine Repair Service, Decatur Industrial Electric, Generator & Motor Services (presently Brush Turbogenerators), Iron Mountain Construction, Midwest Service Center, NAES Turbine Services, ST Cotter Turbine Services, TurbinePros, Wood Group Field Service

Engineering & Construction Company Customers: Black & Veatch, CD Smith Construction, Cherne Contracting Company, Continental Electric Company, Corval Group, Fagen, Inc, Faith Technologies, Hooper Corp., MJ Electric.

Trust KJR Associates Inc as your first source for your Construction, Industrial and Power Plant needs and know that we are available to assist you with finding alternate qualified companies for other products or services at your request. "We know people and we do more." Just ask.

## REPRESENTED COMPANIES

### Beetle Plastics LLC

(A Midwest Cooling Towers Company)

Founded in 1950s, Beetle Plastics provides engineering, manufacturing and installation of a wide line of fiberglass reinforced piping (FRP), composite piping, tanks, ductwork, vessels, and stacks from 0.500" to 14' diameter. Beetle Plastics also manufactures Abrasion Resistant Pipe & Duct which can be used in the following applications: lime slurry, fly-ash slurries, bottom-ash service areas, along with other extremely abrasive conditions. They also manufacture all of the specialty and common thermoset resin products, each with specific corrosion and service advantages.

### Fusion Babbitting Company

Founded in 1989, Fusion Babbitting is ISO 9001:2008 certified, and are in compliance with 10CFR50 Appendix B (Requirements for Nuclear Power Plants) and services many OEMs in re-babbitting as well as manufacturing of new bearings. Fusion can perform centrifugal casting of bearings from 2" bore diameter up to 60" outside diameter up to 7,000 # and can perform TIG welding; static pouring; hydrostatic and ultrasonic testing; and dye penetrant inspection. Fusion guarantees 98 to 100 percent bond to the bearing shell and only uses ASTM grades of "virgin tin base babbitt" in its bearing refurbishments and manufacture process. Fusion also ultrasonically tests all bearings.

Fusion manufactures and refurbishes the following: Three Lobed Bearings, Plain Journal Bearings. Babbitt Liners, Exciter Bearings, Fan Bearings, Fan Motor Bearings, Generator Bearings, Motor Bearings, Oil Deflector Seals, Pump Bearings, Tapered Land Thrust Plates and Thrust Shoes, Tilt Pad (journal/thrust) Bearings, Trunion Bearings, Turbine Bearings, 3 piece Upper & Lower Guide Bearings. Fusion can also perform in-house metalized arc spray to restore worn or damaged bearing seat areas.

## General Equipment & Supply

Founded in 1986, GE&S provides New and Reconditioned Contractor Equipment and Supplies and is an authorized repair center for Greenlee and Ridgid equipment. GE&S can rent, sell, buy/trade and find hard to locate tools and equipment. GE&S provides a 40-60% savings off the new price for reconditioned equipment and most equipment sold has a one year parts/labor warranty. Equipment includes, but not limited to: Air Equipment, Conduit Bending, Cable Pulling, Cable Termination, Generators, Hand Tools, Hoists, Jacks, Lifts, Material Handling, Power Distribution, Pipe Equipment, Power Tools, Safety and Storage Equipment, Testing Equipment, Welding Equipment and Accessories.

## Lift-It Manufacturing Co., Inc.

Founded in 1979, Lift-It is ISO 9001:2000 certified and manufactures a complete line of synthetic webbing, round and high performance fiber, Twin-Path® Extra Slings. Lift-It can also provide the following: Web, Round, Chain, Mesh Slings, Nets, Material Handling, Spreader Bars, Tie Downs, Lever & Chain Hoists, Hoist Rings and Shackles, Fall Prevention, Cordage, RFID, Plate Clamps and SlingMax Products. Lift-It can also inspect, load test and requalify your current safety equipment for future use. Lift-It has also trained thousands of sling users and inspectors through the Lift-It® sling and rigging program. Semi-annual conferences are held in Pomona, CA and on-site programs are readily available.

## Midwest Towers Inc / Midwest Cooling Towers Inc

Founded in 1987 / 2014, Midwest Towers (now known as Midwest Cooling Towers) offers the best values in evaporative water cooling towers for new construction, cooling tower reconstruction or thermal upgrades, cooling tower emergency repair, and cooling tower replacement parts and components. Midwest and their partners include, but not limited to: Amarillo Gear Company, Beetle Plastics, Brentwood Industries, C.E. Shepherd, Hudson Products, Rexnord and Strongwell conduct large scale volumes of business together and as a result Midwest receives generous discounts on cooling tower parts that they purchase and can then comfortably pass more great value and savings onto your company.

Midwest's team will work with you through all stages of your cooling tower project; i.e. design, budgeting, planning and installation. Midwest can also help you with cooling tower thermal performance testing, cooling tower inspections, cooling tower optimization and upgrades and even temporary cooling towers. Midwest also designs, manufactures and installs fiberglass maintenance access platforms for cooling tower fan gearboxes.

## Ultra Fiberglass Systems

Founded in 1985, Ultra is one of the top distributors of super structural fiberglass shapes, i.e. angle, channel, I-beam, wide flange beam, round tube, square tube, flat sheet, concrete embedment angle, threaded rods/nuts. Ultra has become the premier manufacturer of fiberglass ladders, grating, platforms, staircases, fiberglass structural, handrail, tank, pipe and pump supports and all other custom fiberglass fabrications. Fiberglass has the following advantages: corrosion resistant, anti-slip gritted top surface, low maintenance, non-conductive, UV protected for outdoor environments, fire retardant, lighter weight than steel and also less expensive. Many of these products have been used by Industrial and Power Generation facilities for Maintenance and Operations and has improved safety in the workplace.
